Working Group Status

bfd	Bidirectional Forwarding Detection	Dave/Jeff
ccamp	Common Control and Measurement Plane	Adrian/Kireeti
forces	Forwarding and Control Element Separation	Patrick/David
idr	Inter-Domain Routing	Sue/Yakov
isis	IS-IS for IP Internets	Dave/Chris
l1vpn	Layer One VPN	Hamid/Tomonori
manet	Mobile Ad-hoc Networks	Joe/Ian
mpls	Multiprotocol Label Switching	Loa/George
ospf	Open Shortest Path First IGP	Acee/Rohit
pce	Path Computation Element	Adrian/JP
pim	Protocol Independent Multicast	Tom/Mike
rpsec	Routing Protocol Security Requirements	Russ/Tony
rtgwg	Routing Area Working Group	Alex
ssm	Source-Specific Multicast	
vrrp	Virtual Router Redundancy Protocol	Mukesh/Radia

Routing Protocol Standardization Criteria

- Attempts to clarify rules have clarified positions

- Now appears to be fairly strong consensus to not have different rules than the rest of the IETF

§3. WG Procedures

Some working groups within the Routing Area have developed procedures, based on RFC 1264, to require implementations before forwarding a document to the IESG. This action does not prevent those working groups from continuing with these procedures if the working group prefers to work this way. We encourage working groups to put measures in place to improve the quality of their output.
