Recurrence: Mobiles

- Mobile devices have a restricted UI.

- Only a subset of recurrence rules can be edited.

- But that is really not much different from full-blown desktop clients either.

- A crude analysis of client UIs gives a subset of RRULE functionality that is commonly implemented.

Recurrence: Proposal

- Remove:

  - FREQ=SECONDLY/MINUTELY

  - BYSECOND/BYMINUTE

- Profile a subset of BY... rules that are known to be supported by limited UIs.

- or

- Remove all but this subset from 2445bis.

- Generate a table of what is allowed.
