draft-fischl-mmusic-sdp-dtls-01

- Defines a way to signal RTP/AVP stream should be secured with DTLS/SRTP over UDP or DCCP
- Reuses the fingerprint mechanism used in COMEDIA over TLS (RFC 4572)
- Also see:
  - draft-mcgrew-tls-srtp-00
  - draft-fischl-sipping-media-dtls-01

Open Issue

- Need some mechanism to allow opportunistic encryption.
  - "I'm willing to do secure media"
  - "Here's my fingerprint"
- Could also work with…
  - draft-andreasen-mmusic-sdp-capability-negotiation-01
  - draft-kaplan-mmusic-best-effort-srtp-01
  - Or anything else that meets this reqt…
