

# BTNS core update

draft-ietf-btns-core-02.txt

Michael Richardson ([mcr@sandelman.ottawa.on.ca](mailto:mcr@sandelman.ottawa.on.ca))

Nicolas Williams ([nicolas.williams@sun.com](mailto:nicolas.williams@sun.com))

# Changes since -01

- Changes made to example PAD/SPD entries to remove inconsistency as per Stephen Kent
- Re-worded “address accumulation” text
  - Remember, we need the PAD to reject BTNS peers if the traffic selectors they claim for their child SAs could be asserted by non-BTNS peers
  - Better wording: make two ordered passes over PAD, one at authentication time, one at child SA authorization time

Status: Ready for WGLC
