

Welcome to Prague

Jon Lindberg

Vice President, Secretariat Services

It's great to bring everyone together from around the world here to Prague so we can all "Jabber" in the same room.

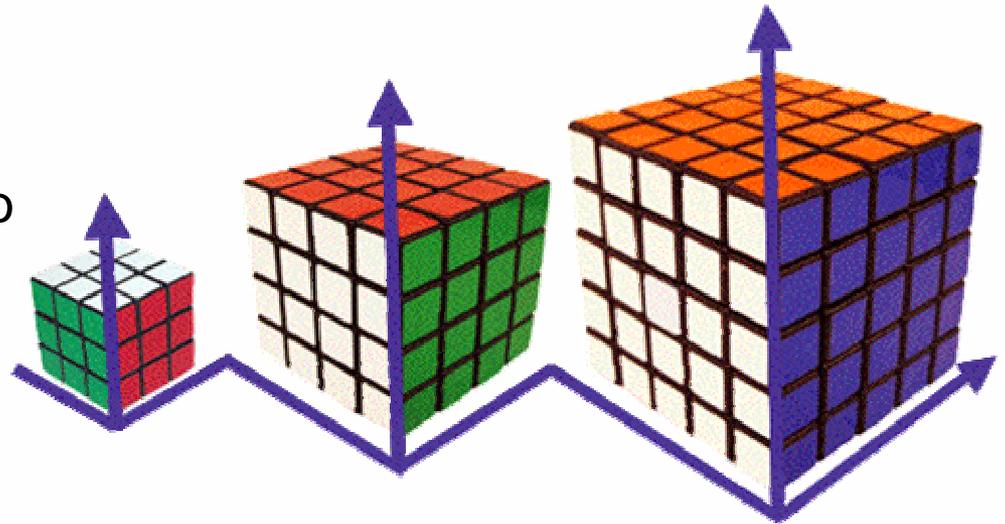

- Serving network operators and community providers by offering seamless interoperability solutions
- Routing virtually every telephone call in North America....about 2/3's of a Trillion calls per year
- So, like the IETF, NeuStar is all about interoperability
- In order to connect competing networks, NeuStar adheres to a stringent policy of neutrality
- NeuStar continues to expand its Internet based service offerings with the same strict adherence to neutrality

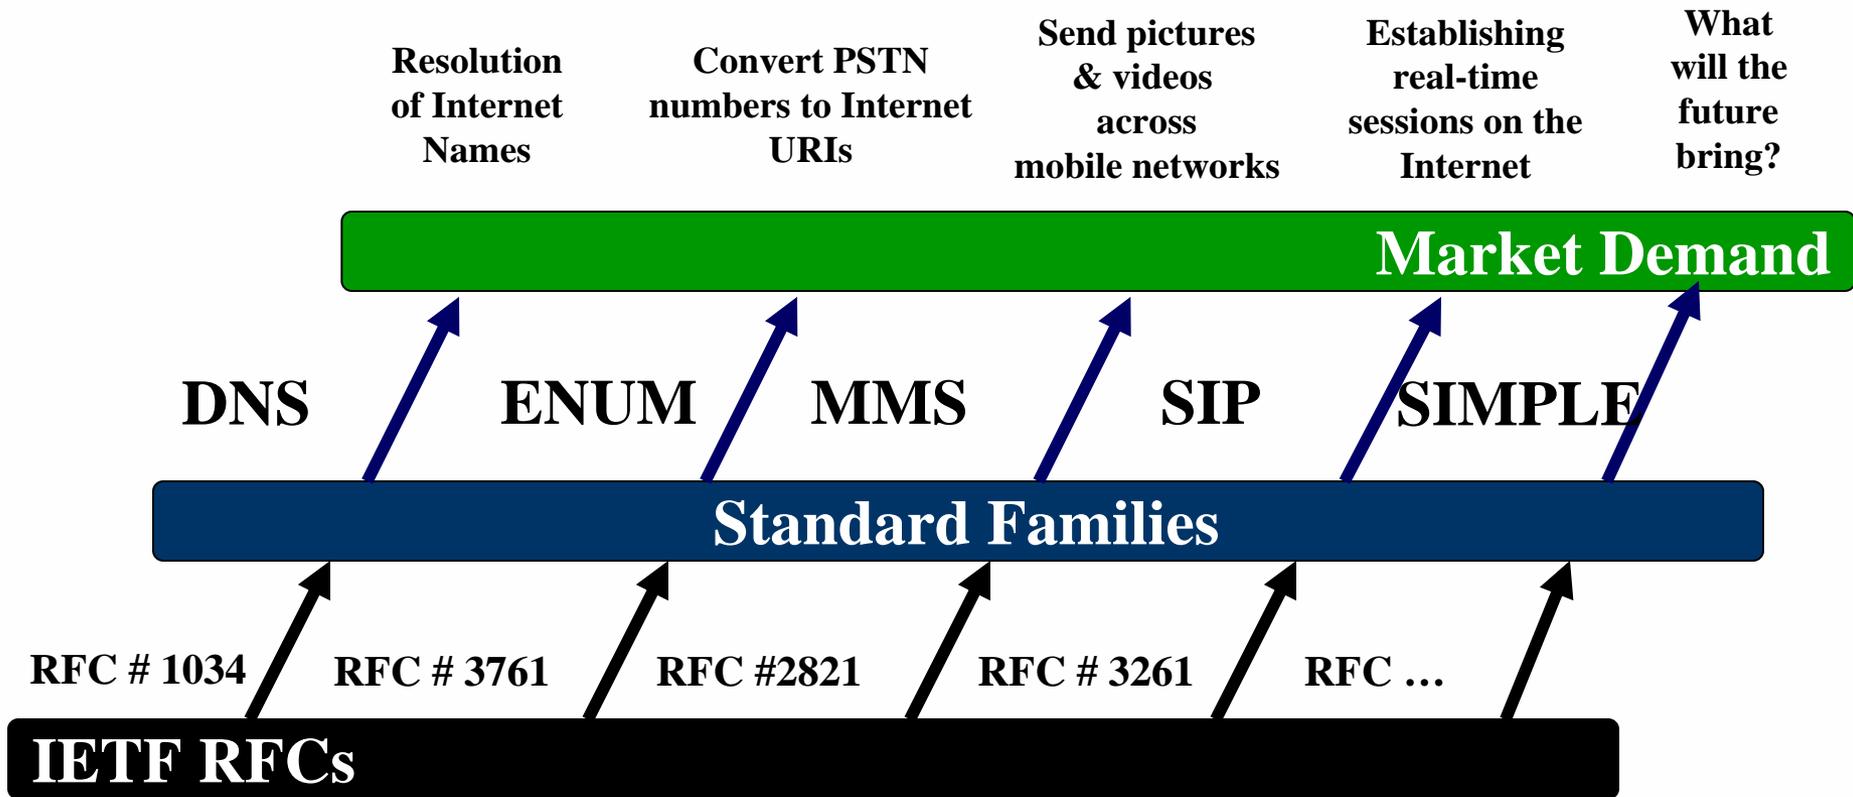

- HQ in Northern VA, with offices in CA, London, Haifa, Singapore, Taiwan, and Beijing
- ~900 people, (NYSE Ticker: NSR)
- 30 Global Points-of-Presence
- Route virtually all calls, global title-based signaling, inter-carrier messaging, for US, Canada, Taiwan, etc.
- Resolve over 22% of the worlds domain names
- Global mobile IP directory for 680 mobile network operators serving 2.5 billion subscribers globally
- Route 80% of mobile multimedia messages in North America.
- 22 Tier One mobile network operator customers for mobile IM
- >50 billion resolution transactions/month
- Route 70% of MSN's IM traffic to mobile phones

- As ***technology*** becomes more **advanced**; and protocols become more **sophisticated**; and the service offerings continue to become more and more **robust**; and the end user expectations continue to **increase**,

NeuStar's reliance on IETF standards is **absolutely essential** in order to be able to continue to deliver successful and unified solutions.

- Mobile IM
 - IM
 - Presence
 - Interconnect
- Local number portability (LNP)
- SIP
 - Service Layer Peering
 - Advanced Services
- Telecom Routing
 - Wireless Common short codes
 - Address Resource Management
 - Network optimization
 - Technology Upgrades
- Managed DNS
 - External DNS
 - Internal DNS
 - Traffic Management
- TLD Registry
 - gTLD, ccTLD
- Identity Federation
 - Single sign-on
 - Mobile identity
- Disaster Recovery
- Secretariat Services

- Mark Foster
- Jon Lindberg
- Jon Peterson
- Richard Shockey
- Ed Lewis
- Brian Rosen
- James Yu
- Rodney Joffe
- Jeff Hodges
- Tom Ely
- Chris Celiberti

- **Identity:** How to identify and characterize the parties in application-layer exchanges securely
- **Real-time Peering:** For voice and instant messaging applications, how can providers best exchange traffic?
- **Secure DNS**
- We continue to see the IETF's work driving our business

- Meetings
- Tools/development/IT infrastructure
- Standards support

Thank you

A large, stylized version of the NEUSTAR logo is positioned on the left side of the slide. The word "NEUSTAR" is in a large, blue, serif font, with a white, textured arrow graphic pointing upwards and to the right, passing through the letter "A". Below the word "NEUSTAR" is the tagline "Trusted to bring networks together" in a smaller, blue, sans-serif font.
