
Overview of the Internet Multicast Routing Architecture

draft-ietf-mboned-routingarch-07.txt

Pekka Savola, CSC/FUNET

AD review issues

- Descriptive, not so much specific advise to operators
 - Is Informational better suited than BCP?
 - Pro for Informational: easier approval process
 - Cons:
 - "BCPs" are implicit in the tables (esp "Status") fields
 - BCP is a has wider IETF review (good) and can be updated

- Normative references to drafts may lead to waiting
 - Most of the references wouldn't need to be normative
 - Most drafts in RFC editor's queue
 - draft-ietf-isis-wg-multi-topology in post-IESG review
 - draft-ietf-mboned-addrarch-05 biggest concern :-)
 - need not be normative reference

 - We should be OK with this
