

Agenda

- Agenda Bashing ~ 5 min
- Introduction & Scope ~10 min (TClausen)
- Scenarios & Requirements ~40 min (TBoot)
- Architectural Considerations and Relationship within the IETF ~40 min (RWakikawa)
- Discussion & Next Step(s) ~25 min (TClausen)

Are there issues with Nested Mobile Networks (Nested NEMO) ?

Are there scenarios
where these problems
are present
?

Are these problems
something, which the
IETF should solve
?

Do the presentations
and discussion today
accurately reflect a “first
step” towards
understanding these
problems

?

What are suitable “next
steps” between this and
the next IETF
?

Follow-up

- <http://www.mobileip.jp/MANEMO>
 - Mailing List
 - Background information - Individual I-Ds
- @IETF69 - this week:
 - MIP6: Tuesday 15:20-17:20
 - MANET: Wednesday 09:00-11:30
 - MONAMI6: Wednesday 13:00-15:00
 - NEMO: Thursday 09:00-11:30
 - AUTOCONF: Thursday 13:00-15:00
 - Ryuji is “fair game” throughout the week ;)
