

IP-DVB WG Meeting (IETF-69) - Chicago

draft-ipdvb-sec-03.txt
ULE Security Requirements

Sunil Iyengar,
University of Surrey, UK
26/07/07

Document History – Version 3

- Fixed editorial mistakes and some important changes by Gorry Fairhurst.
- Table 1 added in Section 6.2 to list the different security techniques to mitigate the various possible network threats.
- Figure 2 modified to clearly explain the different interfaces present in the framework.
- New Section 7 has been added.
- New Section 6 has been added.
- The previous sections 5 and 6 have been combined to section 5.
- Sections 3, 8 and 9 have been rearranged and updated with comments and suggestions from Michael Noisternig from University of Salzburg.
- The Authors and the Acknowledgments section have been updated.

Current Status

- Have updated the draft (version 3) with major comments and suggestions from the mailing list (can be seen in the Document history section)
- There have been no further comments and would request this draft to be submitted to WGLC.
- Would also like to revive ietf-cruickshank-ipdvb-02.txt.
- The authors see this as a follow on to the security requirements draft and would appreciate feedback from the IETF on how to proceed.
