

# Next steps

- Policies enforcement to influence the choice of the CoA
  - Do we have a consensus to adopt *draft-soliman-monami6-flow-binding-04.txt* as a WG document for the 4<sup>th</sup> deliverable (given that the document will be compatible with the generic format of the policies)?

- Definition of a generic format to describe policies / filter rules for flow binding on interfaces

*draft-larsson-monami6-filter-rules-02.txt*

Other proposition?
