4-December-2007

# Changes Made

- Some minor changes to fix pending items
- Major Change: component and componentID
  - Replace all references to LFB element and LFB attribute with component
  - Use element and attribute only in terms of the xml constructs of element and attribute

# Changes Pending

- Jamal has rewritten significant parts of the descriptive text in section 3.
- We are trying to rewrite the event description to be clearer
- Have a filled in IANA considerations section
  - Use ext- for first-come-first-serve LFB classes
- Another WG last call in the near future, and off to the IESG
