Status

- Submitted -00 after IETF69
 - Merged with pre-auth AAA requirements draft by Majid
- Reviewed by two IEEE 802.21 WG members: Ajay Rajkumar and Maryna Komarova
 - -00 was presented in IEEE 802.21 Security SG in September 2007
- Submitted -01 in October after reflecting the review comments
 - Ready for WGLC

Technical changes from -00

- Excluded description on link-layer pre-authentication (out of scope)
- Added description on the provisioning of the servers with database for authenticator discovery
- Added recommendation on non-cryptographic filtering at candidate authenticators
- Added a requirement on protection for context binding
