

On Providing Lightweight  
SeND and Privacy  
Extensions for PMIPv6

draft-haddad-netlmm-pmipv6-privacy-00

# Motivation

- ◆ Privacy is more than an option in EU and some Asian countries (so this is not a wish :)
- ◆ CGA technique may or may not be available in all access networks.

# Goals

- ◆ Ensure that it is not easy to trace the MN!
- ◆ Eliminate the reliance on CGA technique to provide SeND key features by using shared secrets only.
- ◆ Protect against MAG compromise.
- ◆ Eliminate the tunneling between MAG and LMA.
