netlmm wg

IETF 71

Major Changes

- MAG-to-MN Router Advertisement
 - MUST happen after MAG-to-LMA signaling
- MAG_GET_HI function added
 - Recommended values based on MAG's knowledge
- New Security Considerations
 - Eavesdropping, Redirection, Denial of Service

Mailing List Discussion

- Shared link behavior
 - Outside of scope
- When does MN_ATTACH happen?
 - Whenever a link change event is detected
- Where to get HI information
 - L2 or context transfer
