5228 to Draft?

- WG charter is to take SIEVE to draft status
- Do we have the time and energy to do this?
- Key thing will be the implementation report
- Possibly requires revising 5228 depending on what we find

Body IESG Comments

- Current: draft-ietf-sieve-body-07
- Discuss from Tim Polk: issue about use of “*” in comparisons

MIME Loops

- Current: draft-ietf-sieve-mime-loop-04
- New draft addressed most comments from WGLC.
- Not done:
 - A number of substantive changes were not done. These includes fundamental changes to syntax a document re-write/re-ordering.
- Open Issue:
 - Behavior of break

Any Other Business

- Any other extensions to consider?
