

# Extension to SDP for Media Loopback

draft-ietf-mmusic-media-loopback-09

Kaynam Hedayat

Brix Networks

## Status

- New draft (-09) addresses questions and suggestions raised on the mailing list
  - IANA considerations section updated to conform to RFC 4855
  - Examples updated to reflect comments on the mailing list
- Core of the draft has been stable for some time now – most changes are meta level stuff (typos, IANA etc.)
- Number of vendor implementations in the field

## Next Steps

- New RTP Payload types to be reviewed by AVT group
- Last call?
