

IMAP METADATA

Cyrus Daboo, Apple Inc.

Status

- draft-daboo-imap-annotatemore-14.txt:
 - Major revision
 - Simplified data model
 - Removed dependency on LISTEXT
 - Removed entry wildcard behavior
 - Registers bare minimum of useful annotations
 - Addressed SECDIR comments
 - Addressed interaction with ENABLE

Issues

- Interaction with NOTIFY
- Permissions for:
 - Server level annotations - missing
 - Per-mailbox annotations - currently requires only the 'L' right.
- Prohibit control/non-displayable characters in entry names?
- Is COMPARATOR reference needed?
- Option to restrict size of returned values?
