A Protocol for Provisioning Resource Certificates

draft-ietf-sidr-rescerts-provisioning-02.txt
Summary

This document defines a framework for certificate management interactions between a resource issuer and a resource recipient by means of a protocol for interaction between the two parties.
Updates

• Changes since -00 version (Jan 08)
  – Added complete CMS profile for XML wrapper
  – The CMS wrapper MUST contain the signing EE certificate (sec 3.1.1.4) and CRL (sec 3.1.1.5)
  – The CMS wrapper MUST include the content-type and signing-time signed attributes (sec 3.1.1.6.4)
  – Security Considerations (sec 5)
To Do

• Update Security Considerations
• Are we then done?
