

Intra-Domain Federation aka Intra-Domain Bridging

Jonathan Rosenberg

Cisco

Changes in -02

- Terminology change: intra-domain federation to intra-domain bridging
- Removed summary and put content into intro (clarified that one model is not recommended)
- Removed speculative section

Open Issues

- Terminology: intra-domain federation vs. intra-domain bridging vs. something else?
- Does everyone agree these are the full/right set of models?
 - Partitioned
 - Unioned
 - Exclusive

Next Steps

- Get a couple reviews
- Additional documents on addressing real interop problems in federating:
 - Routing mechanism recommendation
 - Interop problems due to differing render functions
 - Session mode issues
 - Rich text and emoticons
 - Optimizations (view sharing)
 - Failure modes
