An Alternative Connection Model for the MSRP

draft-blau-simple-msrp-acm-02

Christer Holmberg
(christer.holmberg@ericsson.com)
Agreement in Dublin to discontinue denis-simple-msrp-comedia
CHANGES FROM PREVIOUS VERSION

• Possible to use only the COMEDIA part of the draft
  – Requested by Ben C

• Usage of SDP c/m- line for connection setup is optional
  – a=msrp-acm attribute used to indicate usage
NUTSHELL

• Usage of COMEDIA for MSRP
• Usage of SDP c- and m-line address information for transport connection set up - instead of address information in the MSRP URI in the a=path line.
• Usage of generic mechanisms for NAT traversal instead of using MSRP specific relays.
• Backward compatible with current MSRP usage
• Allignment with OMA MSRP usage
BACKWARD COMPABILITY

• COMEDIA attributes used to indicate support comadia usage
• a=msrp-acm attribute used to indicate SDP c/m- line usage

• If attribute(s) are not present, clients behave according to RFC 4975
PROPOSAL

• Adopt draft as WG item

Thank You!
