

# An Alternative Connection Model for the MSRP

draft-blau-simple-msrp-acm-02

Christer Holmberg

([christer.holmberg@ericsson.com](mailto:christer.holmberg@ericsson.com))

# NOTE

Agreement in Dublin to discontinue denis-  
simple-msrp-comedia

# CHANGES FROM PREVIOUS VERSION

- Possible to use only the COMEDIA part of the draft
  - Requested by Ben C
- Usage of SDP c/m- line for connection setup is optional
  - a=msrp-acm attribute used to indicate usage

# NUTSHELL

- Usage of **COMEDIA** for MSRP
- Usage of **SDP c- and m-line address information** for transport connection set up - instead of address information in the MSRP URI in the a=path line.
- Usage of **generic mechanisms for NAT traversal** instead of using MSRP specific relays.
- **Backward compatible** with current MSRP usage
- Alignment with OMA MSRP usage

# BACKWARD COMPABILITY

- COMEDIA attributes used to indicate support comedia usage
- a=msrp-acm attribute used to indicate SDP c/m- line usage
- If attribute(s) are not present, clients behave according to RFC 4975

# PROPOSAL

- Adopt draft as WG item

Thank You!
