IPv6 CPE Router

draft-wbeebee-ipv6-cpe-router-04

IETF 74, San Francisco

March 22-27, 2009

v6ops Working Group

Hemant Singh (shemant@cisco.com)

Wes Beebee (wbeebee@cisco.com)

Agenda

- Report changes for the new -04 version.
- Future Work.

Changes since -03 version…

- Clarified Abstract some more.

- Added ND Proxy section for legacy 3GPP deployment.

- Since new DS-Lite doc was published in March 2009, we updated the CPE Rtr for corresponding changes.

Changes since -03 version…

- New section combines DS-Lite, 6to4, and ISATAP.

- Clarified strong host model text. Adding a reference for RFC 1122 against the strong host model text has been missed – will be added in next revision of draft.

- Augmented Packet Filter section.

Changes since -03 version…

- Recommended in Packet Filter section that device not hard-code a prefix such as 2000::3.

Future work…

- One CPE Rtr vendor has requested to highlight CORE vs. developing tech in doc- we are looking into it.

- ND Proxy section will be further clarified to add context for 3GPP deployment.

- More context will be added to other portions of the document.

Future work

- Close any pending issues with the DSL folks in the Broadband Forum.
