

DRM Proxy Architecture

draft-zhipeng-pkix-drm-proxy-architecture

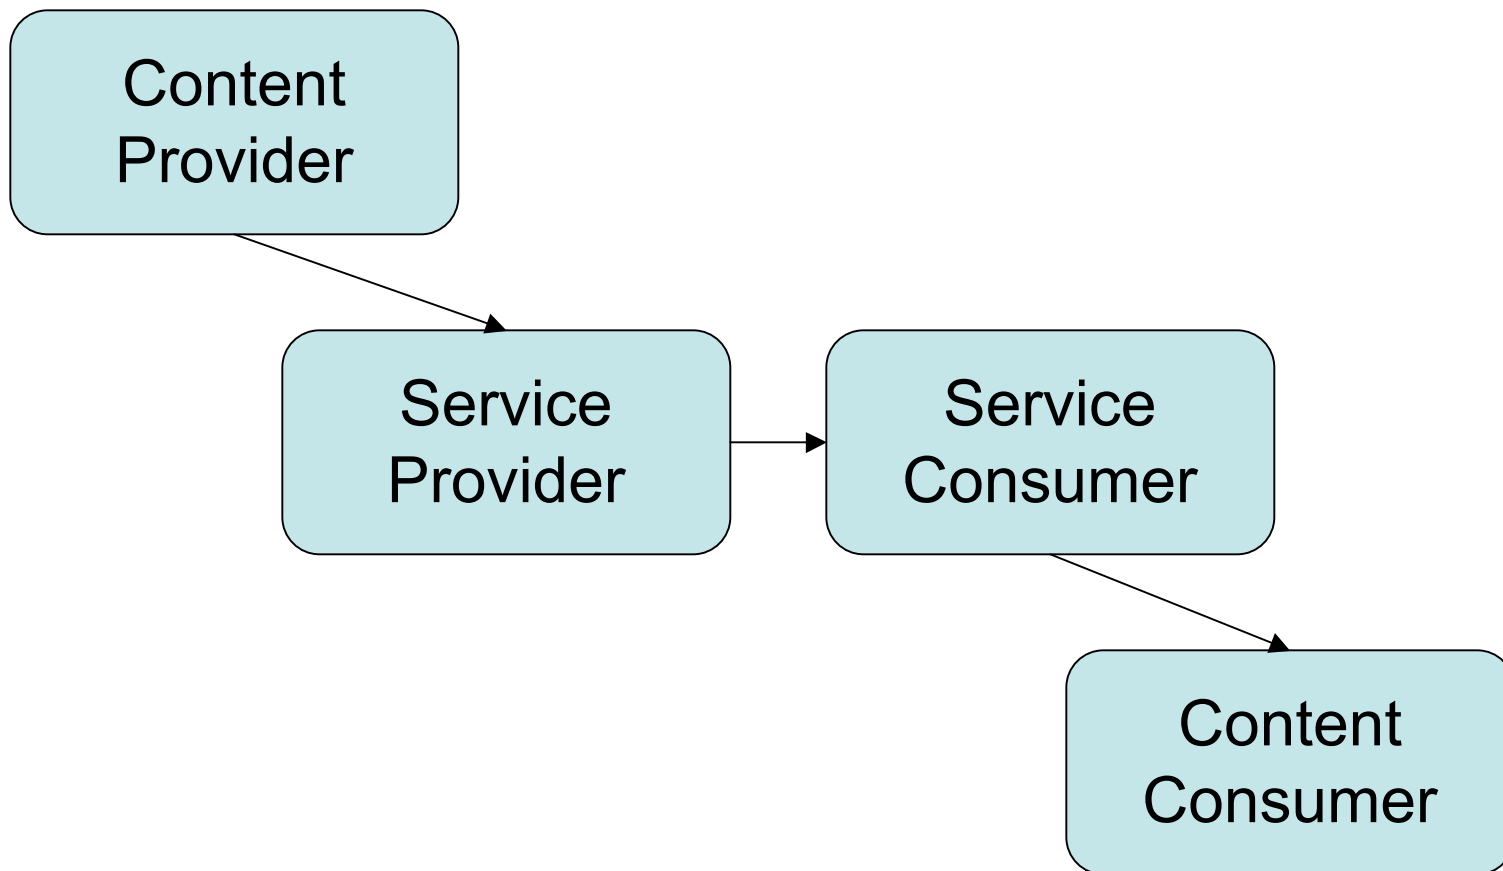

Zhipeng Zhou (via Barry Leiba)

Huawei Technologies

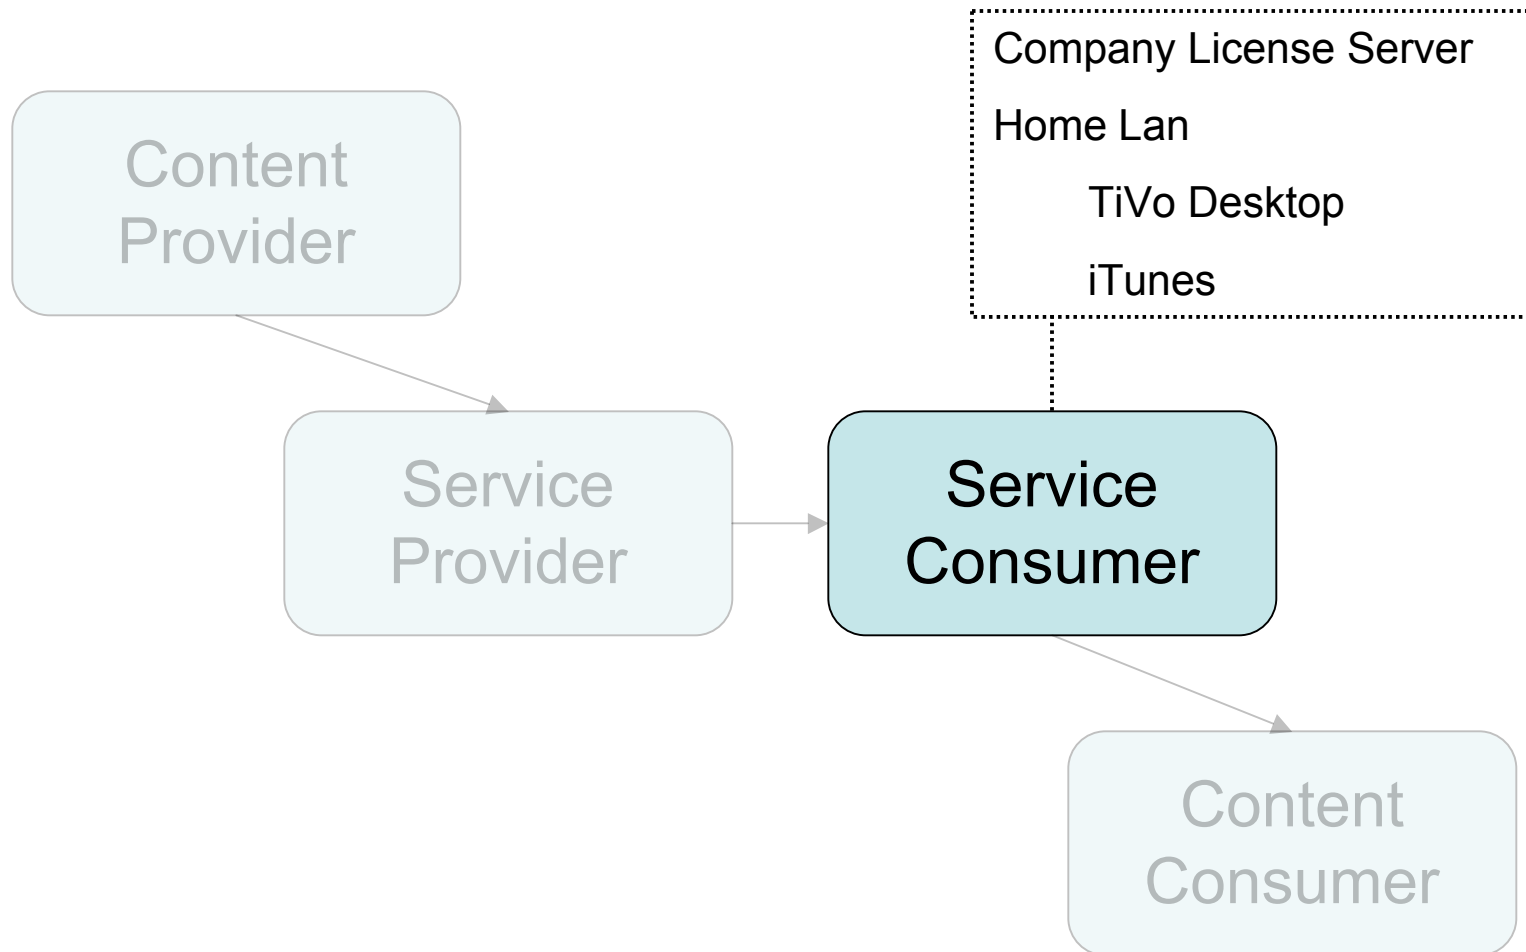

Why?

- Digital Rights Management is something service providers have to deal with.
- Standard mechanisms for managing digital rights add flexibility and interoperability.

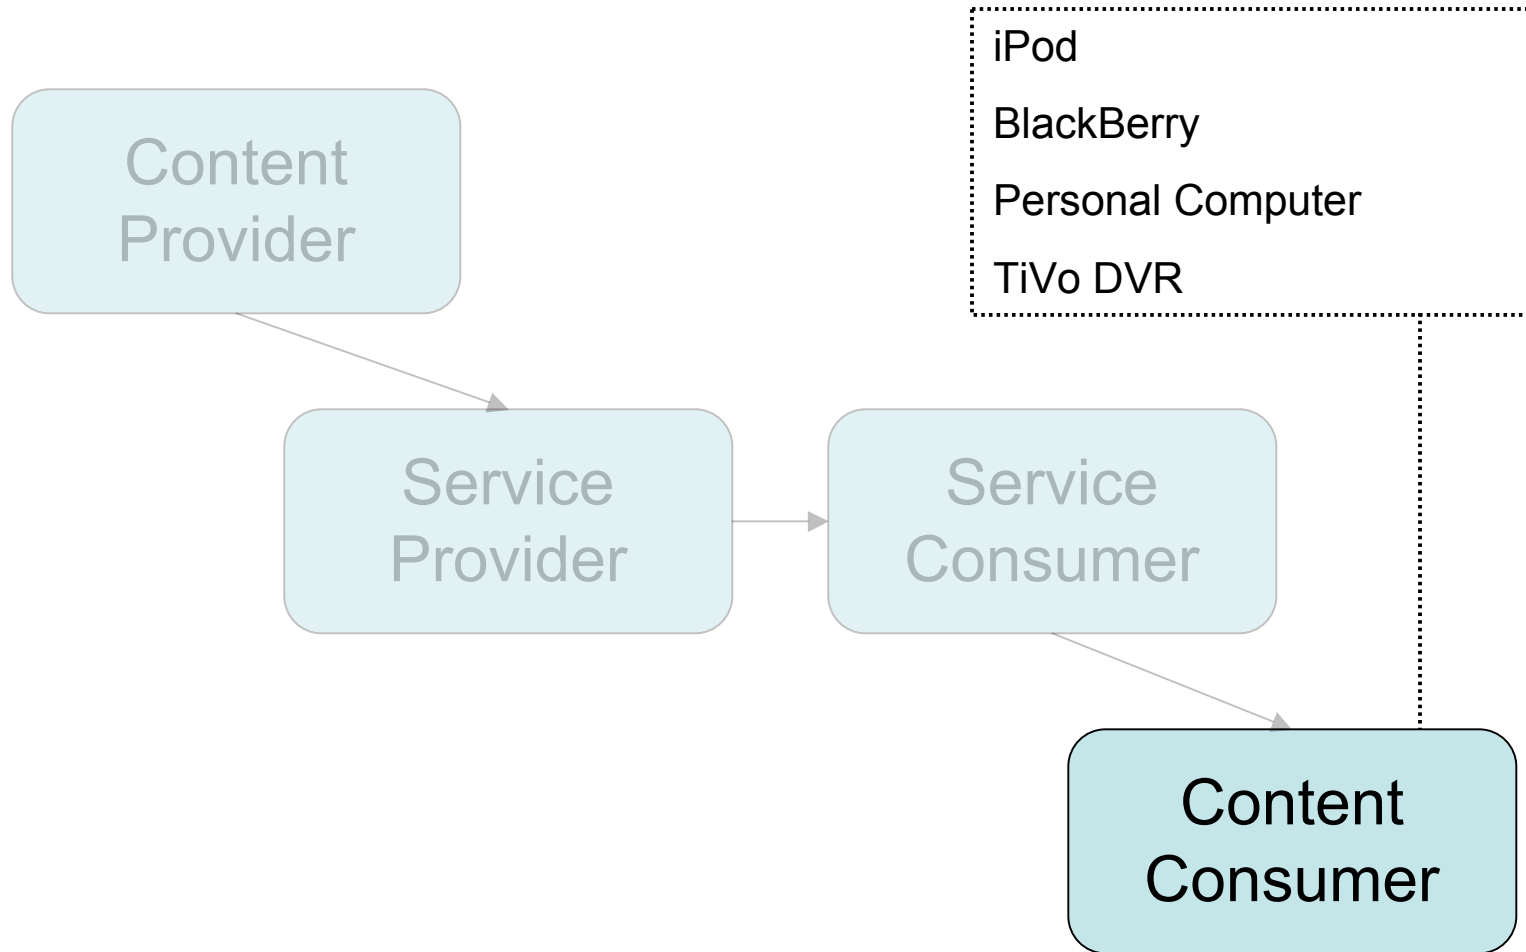

Parties

Proxy Architecture

Trust Architecture

Protocol

- Defines...
 - Authorization Document
 - Use of digital signatures & certificates
- Establishes trust relationship through the proxy

Questions...

- Is standardizing DRM protocols interesting?
- Is it better than having a lot of non-standard stuff out there?
- Future BOF on DRM issues?
