

Simplified Multicast Forwarding (SMF) Status

Joe Macker

IETF 75

Stockholm, Sweden

July 2009

SMF Update

- -09 draft version submitted
- Editorial Updates
- References Updated
- Likely WGLC soon after Stockholm
- Target again is submit for recommended Experimental (EXP) RFC status
 - Issues remain for experimentation prior to STD track

SMF Prototype Implementation

- Available at
 - <http://downloads.pf.itd.nrl.navy.mil/smf/>
- Additional experience achieved with prototype implementation
 - Work with both OLSR and MANET-OSPF interactions for CDS algorithms election
 - Future work to be done with NHDP
- Multiple hash algorithms used for H-DPD
- IPv4, IPv6, IPSEC, fragmentation, and multiple CDS modes tested
- Would like to hear from others for any potential interop testing,etc.
