

ALTO Requirements Update

draft-ietf-alto-reqs-02

Sebastian Kiesel

Rich Woundy

ALTO Requirements Update

- Only minor changes since Stockholm
 - NAT traversal
 - Third party server discovery
- The authors are waiting for new input from
 - advancement of the actual protocol proposal(s)
 - field trials or simulation experiments
 - results of the discovery task force
 - feedback from other operators about acceptable modes of operation
 - feedback from other p2p vendors/users about acceptable modes of operation
 - any other volunteer input
- The purpose of a requirements document is to capture the outcome of discussions in the group with respect to fundamental design issues
- Let's restart the discussion on the mailing list!
