

# DCCP User Guide - Going Forward?

Jukka Manner, TKK

DCCP is a great idea

A nice technology

Very beneficial

(at least I think so)

It does have issues, though

Yet, who cares about DCCP?

“I'm an app writer  
My stuff already works ok  
So why bother with  
This new protocol?”

“I'm a network device vendor  
Why should I bother?”

“What's in it for any of us?”

“What is this DCCP anyway?”

That is the problem...

Why bother...

User Guide to the rescue!

To make the case for DCCP

Sales pitch

A self contained document

No mandatory refs to read  
a priori

Easy for a newbie to check out

Some nits about the current draft

CCID-4 missing

Intro about DCCP missing

More applications

More about benefits (many places)

Why DCCP for 1-way prerecorded?

Padding a MUST?

Some API considerations

Hints how your app would change

So...

Going Forward  
Or  
Home?

Where?
