DTN Reference Implementation Update

Kevin Fall (Intel Labs Berkeley)

Alex McMahon (Trinity College Dublin)

DTN RI -- today

Last release of DTN2 & oasys > 16 months ago (Dr. Mike Demmer moved on to unrelated start-up)

Current releases on SourceForge:
DTN-2.6.0
and
oasys-1.3.0

(see http://dtn.sourceforge.net as starting place)

Maintenance since last release

- DTN2 command line has been updated to provide more options and detailed information on available options + syntax (less RTFM!)
- Configuration options of storage, interface, link, route and discovery commands have been documented in the DTN2 manual
- DTN2 and oasys build scripts updated to carry out extra dependency searches and provide extra warnings and feedback during build

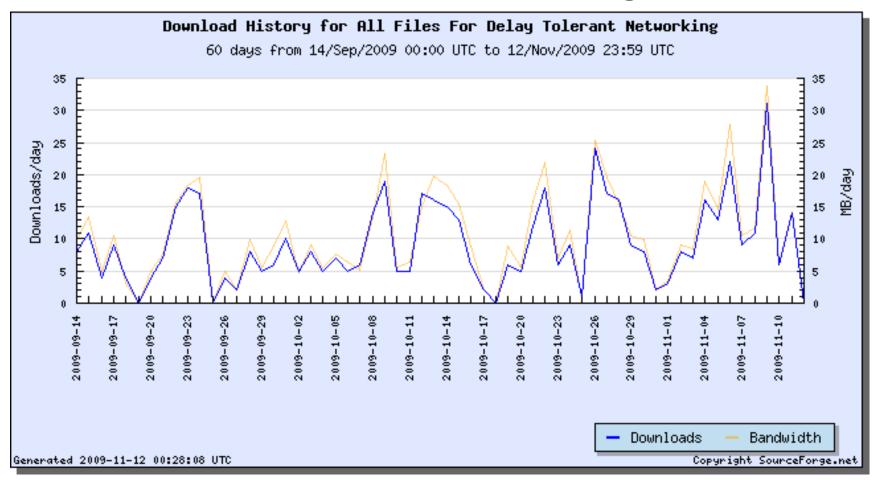

Maintenance (cont'd)

- Some bugs addressed including addition of missing headers, removal of incorrect checks, keepalives, removal of recursive symlinks...
- DTNPerf updated to version 2.4
- Some PRoPHET problems addressed
- Port to OpenWRT (Kamikiaze release) now in SourceForge

DTN Repository Hosting

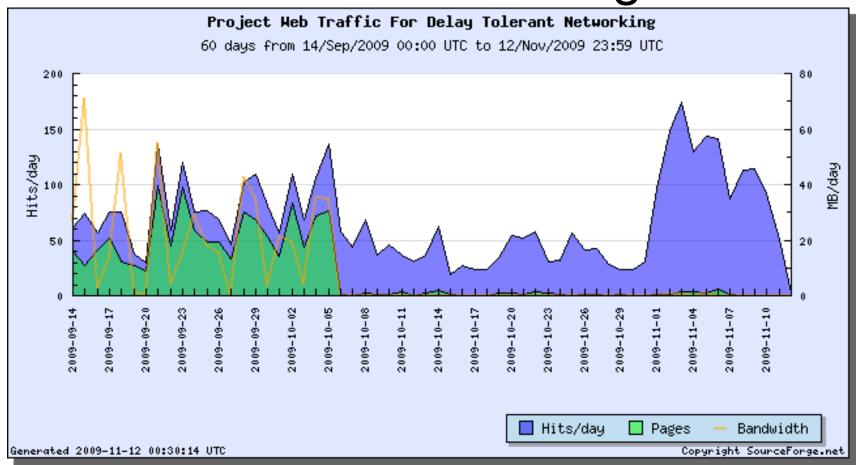

- Repositories now supported by SourceForge
 - read/write through SF
 - integrated with statistics mechanisms
- Implementation of BugTracker on SourceForge notifies dtn-users list on changes
- Working on migration of DTNRG Wiki (Moinmoin based) to MediaWiki
 - And mail lists/archives to SF

DTN on SourceForge

Increase in downloads of DTN2 / oasys

DTN on SourceForge

Increase in SF project hits for DTN2 / oasys

DTN RI – for consideration

- PRoPHET implementation
 - why is it implemented in a different way to other routers?
 - is anyone using it?
 - Is it still an accurate implementation of the draft
 - Does it work ?
 - Can it be removed/altered?
- Implementation of Drafts
 - Establish tracking on implementation of drafts?
 - (with priority ordering)?
 - (with deadlines)?

DTN RI – current/future work

- More updates to command line and documentation are to be committed to repo
- release DTN-2.7.0 & oasys-1.4.0
- Contributors, please provide your (old and new)
 DTN apps for inclusion in /apps/contrib/
- Use BugTracker for bug reports
