

# Bulk Re-registration for Proxy Mobile IPv6

*I-D: draft-premec-netlmm-bulk-re-registration-03*

Basavaraj Patil, Domagoj Premec, Suresh  
Krishnan, Sri Gundavelli, Kent Leung

# Update

- The I-D has now been merged with the “MN Group ID Option”, I-D: draft-gundavelli-netext-mn-groupid-option
- Rev 3 of the I-D is the merged document
- Consensus call to adopt this as WG baseline completed
  - Conclusion to adopt the I-D as WG doc
- Will be submitted as WG doc after IETF76

# Content

- No major change in the content itself in terms of what was presented at IETF75

# Next steps

- What we need is some reviews by WG members to enhance the maturity and address any concerns that may exist before we proceed to WG LC
- Aim to get to WG LC before the IETF77
