Diameter NAPT Control Application – Status Update
(draft-ietf-dime-nat-control-02)

Authors
Frank Brockners (fbrockne@cisco.com), Shwetha Bhandari (shwethab@cisco.com),
Vaneeta Singh (vaneeta.singh@gmail.com), Victor Fajardo (vf0213@gmail.com)
Status

- WG document since IETF75
- Changes from -01 to -02
  (special thanks to Jouni & Hannes for detailed reviews)
  - Reference to pull mode removed, session initiation event clarified in section 4.1
  - Added Redirect-* AVPs in NCA command
  - Removed reference to Called-Station-Id AVP in NCR command
  - Added support for bindings providing AFT (NAT64)
  - Editorial changes (shorter & crisper);
  - Document name change to “Diameter Network Address and Port Translation Control Application (DNCA)”
Document Evolution, Next Steps

- **Discussion**
  - Any further functional additions required?
  - Any additional clarifications needed?

- **When to evolve to WG last call?**
  - Additional reviewers (2 document reviews done so far)
