

# Diameter Attribute-Value Pairs for Cryptographic Key Transport

draft-ietf-dime-local-keytran-02

Glen Zorn

Qin Wu

# Status

- Presented in IETF 76, adopted as WG item based on feedback from the Group
- Concluded the WGLC on the 7th March, 2010
- Changes in latest version 02 WG draft
  - Specify SPI as an optional AVP contained in the Key AVP
  - Add one new contributor to the author list

# Comments from WGLC

- Introduction Section
  - Suggest to reword as these newly defined AVPs are meant to be used by future applications
- Security Section
  - Suggest to bring more text to explain what Diameter does to protect keying material

# Moving Forward

- Request WG Chairs to advance the draft.
