

# Kerberos Information Model

Leif Johansson  
leifj@sUNET.se

# Status

- Version 07 in WGLC
- Changes for 08 based on WGLC comments:
  - 6.1.1.14: principalRealm must be single-valued
  - English language cleanup (thanks to Greg Hudson!)

## Open issue(s)

- Greg Hudson: some implementations don't need canonical principalName for salting keys.
- Greg Hudson: no need to separate keys from the rest of the model.
