Updates

Second revision to draft [1]; including:

- The inclusion of raw data collection in the new reportHistoryGroup,
- Renamed the old reportUsrHistorygroup (borrowing blatantly from the usrHistory Group within RMON2 [RFC2021]) to the reportSampledGroup (more appropriate naming),
- Modified the overall structure of the MIB to incorporate the new and complete structure, i.e.,
  - Statistical reporting - reportStatGroup,
  - Sampled reporting - reportSampledGroup, and
  - Historical reporting - reportHistoryGroup,
- Compared REPORT-MIB capabilities to desired performance management information from the discussion in the NHDP-MIB [2] that U. Herberg is developing.
Work Items:

- Work up a proposed set of Notifications.
- Work up the Security Section.

Question:

- Is this work appropriate for consideration as a working group document?
