draft-ietf-netmod-yang-usage-03

Andy Bierman
andyb@iwl.com

Changes from -02 to -03

- Minor clarifications only:
  - Updated figure 1 to align with 4741bis draft
  - Updated guidelines for import-by-revision and include-by-revision
    - Only applies to groupings (typedefs removed)
  - Added file name to <CODE BEGINS> line in ietf-template.yang
    - Match ietf-yang-types convention

Mailing List Comments

- From Martin (3/17)

    - remove application term (not used)

    - replace module naming guideline with pointer to YANG guideline

    - Cleanup XPath guideline in sec. 4.4

    - Remove module namespace SHOULD NOT change guideline (incorrect)

    - Correct import reference guideline in sec. 4.6

    - Fix unclear guideline in sec. 4.7

    - Fix TBD links in Appendix A

Mailing List Comments (2)

- From Juergen (3/19) [removing overlaps]
  - cleanup usage of term RPC operation
  - MIB boilerplate reference needs to be fixed so it points to an online YANG boilerplace
  - Fix typo s/RPC/RFC
  - Remove mention of NETCONF capabilities
  - Remove guideline about filename in description-stmt
  - Change namespace guideline so it is a suggestion (MAY)
  - IPR and copyright notice updates needed

Summary

- new -04 draft (in 2 weeks) will address latest WGLC review comments:

    - make all suggested changes

    - determine when NETCONF versions of online SNMP guidelines are needed

    - align with latest TLP (should be good for a month! :-(
