Note Well

Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- the IETF plenary session,**
- any IETF working group or portion thereof,**
- the IESG or any member thereof on behalf of the IESG,**
- the IAB or any member thereof on behalf of the IAB,**
- any IETF mailing list, including the IETF list itself,
any working group or design team list, or any other
list functioning under IETF auspices,**
- the RFC Editor or the Internet-Drafts function**

All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879).

Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice. Please consult RFC 5378 and RFC 3979 for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

 - RegEx
 - External Lists
 - EAI Issues
 - Benefits of SIEVE
 - Test scripts

Notary

- New draft: draft-freed-sieve-notary-06.txt
- WGLC's complete - some feedback from WG participants addressed - Chairs would like more feedback to gauge WG consensus
- Chairs would like to know who plans to implement this

Notify SIP

- Expired: draft-ietf-sieve-notify-sip-message-01.txt
- Waiting on authors to refresh
- Chairs would like to know who plans to implement this

Include

- Expired draft: draft-sieve-include-02
- Waiting on authors (yes the Chairs!) to refresh
- No more open issues listed.
- Will do WGLC as soon as new draft is available
- Chairs would like to know who plans to implement this

IMAP-SIEVE #1

- New draft: draft-ietf-sieve-imap-sieve-00

External Lists

- Expired draft: draft-melnikov-sieve-external-lists-02
- What is the level of interest in this?

RegEx

- New draft ready `draft-ietf-sieve-regex-01.txt`
- Open issues:
 - The major open issue with this draft is what to do, if anything, about localization/internationalization. Are [IEEE.1003-2.1992] collating sequences and character equivalents sufficient? Should we reference the Unicode technical specification? Should we punt and publish the document as experimental?
 - Is the current approach to comparator integration the right one to use?
 - Should we allow shorthands such as `\b` (word boundary) and `\w` (word character)?
 - Should we allow backreferences (useful for matching double words, etc.)?

- See Barry's slides

WG Futures

- Level of activity in WG is low
- Is this just a temporary aberration or have we reached the end of usefulness of this WG?

Any Other Business?
