Auto-responding from Sieve

Three new document proposals...

Barry Leiba & Robins George

Huawei Technologies

draft-george-sieve-vacation-time

- Want to use Vacation extension for other purposes.

- Vacation limits auto-reply interval to numbers of days

- Adding seconds/minutes/hours gives more options

- Settling on "seconds"

- Implementation may enforce a minimum interval

draft-george-sieve-notify-presence

- Want to use presence information in tests
- Sieve-notify already has one case of this
    - notify_method_capability, "online"
- Adding "busy", "show", and "status" to test information from XMPP
- Concern: this does kind of overload "notify". On the other hand, we're already there.

draft-george-sieve-autoreply

- Informational document to explain how to use other extensions to implement a general, intelligent auto-reply function.

- Could go as BCP, perhaps ?
