

# DNSEXT

IETF 78  
Maastricht, NL

*Chairs:* Olafur Gudmundsson, Andrew Sullivan

**I E T F<sup>®</sup>**

# Note well

Any submission to the IETF intended by the Contributor for publication as all or part of an IETF Internet-Draft or RFC and any statement made within the context of an IETF activity is considered an "IETF Contribution". Such statements include oral statements in IETF sessions, as well as written and electronic communications made at any time or place, which are addressed to:

- The IETF plenary session
- The IESG, or any member thereof on behalf of the IESG
- Any IETF mailing list, including the IETF list itself, any working group or design team list,

or any other list functioning under IETF auspices

- Any IETF working group or portion thereof
- The IAB or any member thereof on behalf of the IAB
- The RFC Editor or the Internet-Drafts function

All IETF Contributions are subject to the rules of RFC 5378 and RFC 3979 (updated by RFC 4879). Statements made outside of an IETF session, mailing list or other function, that are clearly not intended to be input to an IETF activity, group or function, are not IETF Contributions in the context of this notice.

Please consult RFC 5378 and RFC 3979 for details.

A participant in any IETF activity is deemed to accept all IETF rules of process, as documented in Best Current Practices RFCs and IESG Statements.

A participant in any IETF activity acknowledges that written, audio and video records of meetings may be made and may be available to the public.

# Existing items

1. Order, report of Chairs (brief)
2. Existing items (30 minutes)
  - draft-ietf-dnsext-rfc2671bis-edns0
    - Needs an editor; we've asked someone
  - draft-ietf-dnsext-rfc2672bis-dname
    - Is the CNAME issue resolved? (hum yes/no) Goes in another document? (hum yes/no)

# Existing cont'd

## 2. Existing items (30 minutes, cont'd)

- draft-ietf-dnsext-dnssec-registry-fixes
  - New proposal coming to address previous process issues
- draft-ietf-dnsext-dnssec-bis-updates
  - text re: rollover and die ok? (hum yes/no)
  - New proposal after design team meeting

# The proposal

- Only relevant if original query is CD=0
- “Always set”: set CD on upstream no matter whether you have a covering TA
- “Never set”: don’t set the CD on upstream queries, preferring something upstream to do validation for you
- “Sometimes set”: set CD depending on your trust anchors
- We want a default.

# BNAME and competitors

draft-yao-dnsex-bname-03 and draft-sury-dnsex-cname-dname-00

1. Discuss merits of doing anything
2. Discuss merits of BNAME vs. C+DNAME
3. Objections to methodology for understanding C+DNAME
4. Sense of room: adopt something, and if so which one?

# Shadow zones

draft-vixie-dnsextdnssshadow-00

- Should we do this?
- If BNAME or C+DNAME won't work, is this still worth doing?

# Overview/requirements

draft-yao-dnsext-identical-resolution-01

# Charter

- Discussion on timelines
- Other items to address?
- Support (with any modifications apparently widely supported integrated)

# Charter timelines

- June 2010 RFC3597-bis Unknown RR advanced to IESG for PS
- July 2010 DNSKEY Registry fixes and allocation procedure advanced to IESG
- July 2010 DNSSEC Errata document to IESG
- Sept 2010 EDNS0-bis update advanced to IESG
- Dec 2010 TSIG/MD5 Obsoleting to IESG
- Dec 2010 IXFR-only to IESG
- July 2011 WG consensus on new or revised RRTYPEs for DNS tree aliasing work
- July 2011 Interoperation testing on new or revised RRTYPEs for DNS tree aliasing (particularly with existing deployed code)
- Nov 2011 Document on new RRTYPE or revised RRTYPE handling for DNS tree aliasing to IESG
- Nov 2011 Document on in-zone metadata for DNS tree aliasing to IESG
- Nov 2011 Document on uses and limitations of different DNS tree aliasing techniques to IESG

# Alt charter timelines

- Aug 2010 RFC3597-bis Unknown RR advanced to IESG for PS
- Aug 2010 DNSKEY Registry fixes and allocation procedure advanced to IESG
- Aug 2010 DNSSEC Errata document to IESG
- Sept 2010 EDNS0-bis update advanced to IESG
- Sept 2010 IXFR-only to IESG
- Jan 2011 WG consensus on new or revised RRTYPEs for DNS tree aliasing work
- Feb 2011 Interoperation testing on new or revised RRTYPEs for DNS tree aliasing (particularly with existing deployed code)
- May 2011 Document on new RRTYPE or revised RRTYPE handling for DNS tree aliasing to IESG
- May 2011 Document on in-zone metadata for DNS tree aliasing to IESG
- May 2011 Document on uses and limitations of different DNS tree aliasing techniques to IESG

# draft-crocker-dnssec- algo-signal-06

- Objection to the plan to give “shepherd” job to Patrik Fältström?
  - ❖ Even if one of the chairs provides a lot of admin support?

# draft-kerr-ixfr-only-01

- Adoption confirmed by standard rule
- Is the timeline good?
- Who thinks the document is ready for WGLC?

# draft-eastlake-dnsext-xnamercode-02

- Should we adopt this (y/n)?
  - ❖ Refer also to previous discussion on DNAME document
- Does the document need more work before LC?

# draft-dempsey- dnscurve-01

- Some strong support to adopt
- Some strong counter-reactions
- Adopt? (y/n)?
- If adopt, we need timelines. First proposals?

# draft-faltstrom-uri-05

Do we need to adopt the document (given that it's already proceeding through expert review)?
