# Using CGAs for Secure Access Control

- draft-dong-savi-cga-header-03.txt
  - Specifies an IPv6 extension header to hold the CGA parameters associated with the source CGA
  - Can validate a packet was sent by the CGA owner
  - Enables secure IPv6 address-based access control and/or no-config transition to IPsec or other security mechanisms
  - Will be presented in saag on Thursday
- Old-Fashioned Bar BOF Thursday PM
  - In NH Maastricht Bar, 1930-2030
  - To discuss direction/next steps for CGA-based access control/security
- Discussion on cgasec@ietf.org
