

# IPFIX Mediation: Framework

---

IPFIX IETF-78 July 25, 2010  
draft-ietf-ipfix-mediators-framework-07

**Atsushi Kobayashi, Benoit Claise,  
Gerhard Munz, Keisuke Ishibashi**

# History

---

In IETF 77 week, an editing session was held with some members. Thanks!

We discussed about security consideration section.

- The topics should be done in the same way as in the File Format RFC5655.
- The feedbacks of the editing session were included in -06 version.

WG Last Call for -06 version were started on May.

- During LC, Brian improved entire security consideration section, and suggested it.
- Several feedbacks were pointed out from Christoph.

Posted -07 version including these feedbacks in July.

# Security Consideration

---

Thanks to Brian's contribution, this section was enhanced exceedingly well.

The following sub-sections encompass security issues possibly happened on IPFIX mediation.

- **9.1. Avoiding Security Level Downgrade**
- **9.2. Avoiding Security Level Upgrade**
- **9.3. Approximating End-to-End Assertions for IPFIX Mediators**
- **9.4. Multiple Tenancy**
- **9.5. Configuration Protection**

# Next step

---

- o We had fully discussed in IPFIX mediation during second WGGLCs in problem statement and WGGLC in framework.
  - n During WGGLC in problem statement draft, we often discussed framework draft as well for long time.
- o Authors think there is no open issues.
- o Next Step, submit it to IESG?
