

IPsecME WG Status

Yaron Sheffer,
Paul Hoffman

IETF-78, Maastricht

Agenda for Today

- Status (these slides)
- High availability
 - Problem statement recap
 - Solution draft (not yet a WG item)
 - Discussion
- Rapid crash discovery
 - Presentation and discussion

Ceremony

- Agenda bashing
- Blue sheets
- Scribe
- Jabber scribe
- Audio streaming (no WebEX today)

Document Status

- ESP-null Heuristics published as RFC 5879 during last meeting
- IKEv2 with AES-CTR published as RFC 5930
- Three drafts in RFC Editor queue
 - IKEv2-bis (hooray!)
 - EAP Mutual Authentication
 - HA Problem Statement (for Informational RFC)
- IPsec Roadmap is in IESG review

And now for the Bad News...

- Interest shown during the F2F meetings did not translate to mailing list participation
- We had to drop PAKE (password authentication in IKE) from the charter because only the authors were interested
- Crash discovery is not faring well, either...
- Co-chairs will NOT decide for the group
 - No participation → no progress
