

# Update on NHDP/OLSRv2 MIB drafts

Ulrich Herberg

Robert Cole

Thomas Clausen / Ian Chakeres

## Update from -03 to -04 of draft-ietf-manet-nhdp-mib

1. Editorial updates (shortened the draft by several pages)
2. Added information identifying objects requiring non-volatile storage within the DESCRIPTION clause of some objects
3. Updated to to NHDP draft version 12

## Update from -03 to -04 of draft-ietf-manet-nhdp-mib

- 4. Changed type of several objects in the MIB
- 5. Removed link-quality object for performance reasons
- 6. Removed references to SMF- and OLSRv2-MIB

## TODOs for draft-ietf-manet-nhdp-mib

- Have MIB-doctors check the draft
- Are DEFVALs required for NHDP parameters?
- Define thresholds for NHDP notifications
- **Ask for feedback from implementers**

## Update from -01 to -02 of draft-ietf-manet-olsrv2-mib

1. Editorial updates (shortened the draft by several pages)
2. Made coherent with NHDP-MIB
3. Cleaned up errors
4. Added Security Considerations section

## Update from -01 to -02 of draft-ietf-manet-olsrv2-mib

- 5. Updated "Relations to other MIBs" section
- 6. Added Notifications section (but no notifications defined yet)
- 7. Changed type of several objects in the MIB (for timers)
- 8. Added information identifying objects requiring non-volatile storage within the DESCRIPTION clause of some objects

## TODOs for draft-ietf-manet-olsrv2-mib

- Have MIB-doctors check the draft
- Define notifications
- **Ask for feedback from implementers**
