

3530bis update for IETF 78

Tom Haynes
Principal Software Engineer

Administivia

- Source is on github:
 - <http://github.com/loghyr/3530bis>
- Tasklist is on github in 3530bis repository
 - Needs to be periodically communicated on the mailing list
 - Still getting new items
 - Need to triage
 - Priority
 - Accept or reject

Major changes since IETF 77

- Updated error section
 - Formatted like 5661
 - Updated codes allowed by operations
- Updated ACL section
 - Mainly pulled from 5661
- Updated Multi-Server Namespace section
 - Mainly pulled from 5661
 - Change of text about problems facing 3530bis implementations and how fs_locations_info fixes them
- Updated i18n section
 - Dave to talk about

Need some target dates

- Task list triaged
- Editing complete
- Reviewed complete
 - Includes re-edits
- Submitted
