

draft-vixie-dnsext-resimprove-00

DNSEXT - IETF79 - Beijing

Frederico Neves

Motivation

- Common sense non controversial resolver optimizations
- Recommendations are optional and could be implemented only by interested caching resolvers

Responsiveness

- Delegation Revalidation based on the parent's NS hints TTL

Resiliency

- Stopping Downward cache search on RCODE3

Robustness

- Upgrade NS RRset credibility upon delegation events

Adoption by the WG

- Does this work fit the WG charter ?
- Does the WG have an interest in adopting this as working item ?
