Implementation Updates

Ulrich Herberg
Justin Dean
“Mini-Interop”

- Ulrich’s network emulator (JOLSRv2) sending 30 HELLOS each advertising 30 two-hop neighbors (i.e. 900 routers) to NRL NHDP
- Both implementations operating on Mac OS X
  - Multi-interface support on Mac is lacking
- Successful test, parsing correct, expiration of tuples worked
Next Steps

- Testing both implementations on CORE
