

MIF Current Practice Analysis

draft-cao-mif-analysis

MIF WG@IETF79

Beijing, CN

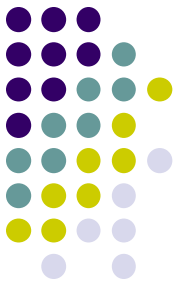

Goal of this document

- Expand the description of the problems identified in the problem statement
 - The problem description and their cause
- Assess whether current OS's encounter the problems
 - Mobile Handset Operating, S60, WM, RIM, Android, AMSS
 - Computer Operating Systems, Win/Linux/MACOS

Status

- Problem descriptions are there
- Assessment of each OS is still void, we need people to contribute text
- Some information in the current practice draft
 - No analysis of which set of problems have been solved and which has not been done well.
- Is this document helpful? Since we start working on the solutions...

Thank you
