RFC3530bis Update

Thomas Haynes

NetApp Confidential – Limited Use

Task List

- 42 items
 - 12 items finished
 - 3 are big ticket items
- Sorted by priority
- All 3530 errata taken care of
 - Just one :->
- New issues still arriving
 - avg of 1 per month

- 7.9's definition of a struct `fs_location4`, the `server<>` field's type was changed from `utf8str_cis` to `utf8val_must`
- Violates mandate about bis'ness
- "Nobody can follow the protocol as stated in 3530."
– Trond Myklebust

Schedule

■ Last Call

– IETF 80 - February 2011

■ Pros

■ Cons

– Large effort on part of editors

– Large effort on part of reviewers

– IETF 81 - July 2011
