

# Savi Threats Status

Joel M. Halpern

# Main issues

- Suggestion from reviewer to remove almost all of section 6, section 7, and section 8 of the document
  - I am happy to make things shorter
  - This requires WG endorsement.
    - The chairs will judge, but we need more than silence

# Confusion about what threats

- Some discussion of relevance of BCP 38
- Discussion among only a small number of people
- Do we need to change which threats we describe?
  - Current document does not assume BCP 38
