DANE WG I-Ds work

- Release Early, Release Often
 - New draft is released once an issue(s) is solved
 - We are already at -06 for draft-ietf-dane-protocol
- Keep track of issues
 - Our mailing list is high volume
 - Issues could get lost
 - We use issue tracking
 - <http://trac.tools.ietf.org/wg/dane/trac/report/1>
 - (Try to) open one issue at the time

Issue tracking workflow

- 1) Issue is identified in the mailing list
- 2) Issue is created in the trac (issue tracking)
- 3) Issue is opened in the mailing list
 - We try to open one issue at the time
- 4) Issue is worked upon
- 5) Call to the WG
 - a) Consensus reached → close issue; go to 1) or 3)
 - b) Consensus not reached → go to 4)

Some stats

- 21 tickets [* TODO update the numbers]
 - 10 closed
 - ~2 issues closed per I-D update
 - 11 open issues

Mailing list rename

- Keep the name aligned with WG name
 - keyassure@ietf.org → dane@ietf.org
- Some people are confused
 - keyassure → kidns → dane
- Will happen after IETF here
 - All people will be resubscribed
 - Archive will be mirrored
