

DNSSEC Operational Practices, Version 2

draft-ietf-dnsop-rfc4641bis-06

Matthijs Mekking, NLnet Labs

From 5 to 6

- More review
- Algorithm rollover (4.1.5)
- Stand-by keys (4.2.4)
- Non cooperating operators (4.3.5.2)

Algorithm rollover

- “How should we interpret section 2.2 from RFC 4035?”
- Ongoing discussion in dnsex
- 4641bis-05 describes the *conservative approach*
- Motivation for this in version 6 *not preferring the one or the other*

Stand-by keys

- “Missing text about Stand-by keys”
- Section 4.2.4 in version 6

Non cooperative operators

- “This issue can be closed”
- Some more clarifications in version 6
 - We still think this can be closed

Closing issues

- Closing open issues (since IETF78)
