

Dynamic Link Exchange Protocol

DLEP

IETF 80

Stan Ratliff

sratliff@cisco.com

Current Status

- Open source implementation on Source Forge
 - (<http://sourceforge.net/projects/dleptools>)
- Outstanding issues:
 - Reduce number of TLV's that need to be allocated
 - Status – Work in progress
 - Use of RFC 5444 address blocks to signal far-end addresses.
 - Status – Need more discussion, especially for dual-stack deployments

Current Status cont'd

- Additional explanations and editorial changes to provide more clarity
 - Status: Work in progress

Next Steps

- Create 01 version of the document and post for comments
- Any and all comments welcome!
