

WG roadmap: next steps

Jean-Michel Combes

Goals & Milestones

- Mar 2010 - Submit document on threats to IESG for Informational RFC
- Dec 2010 - Submit Ethernet-based broadband access network solution to IESG for Proposed Standard
- Dec 2010 - Submit protocol framework to IESG for Informational RFC
- Dec 2010 - Submit SLAAC solution to IESG for Proposed Standard
- Dec 2010 - Submit SeND solution to IESG for Proposed Standard
- Dec 2010 - Submit DHCP solution to IESG for Proposed Standard

Document on threats

- SAVI Threat Scope (draft-ietf-savi-threat-scope-04)
- WGLC concluded
- Next step: request for IESG review initiated during next week

Protocol framework

- Source Address Validation Improvement Framework (draft-ietf-savi-framework-04)
- IESG review initiated
- Next step: AD review

DHCP solution

- SAVI Solution for DHCP (draft-ietf-savi-dhcp-07.txt)
- Next step: WGLC initiated during next week

SLAAC solution

- FCFS-SAVI: First-Come First-Serve Source-Address Validation for Locally Assigned Addresses (draft-ietf-savi-fcfs-05)
- WGLC concluded but:
 - One comment still open (i.e. SAVI logging)
 - Name of the draft should be modified to reflect the document is only focused on IPv6
- Next steps:
 - Decision about SAVI logging on the ML
 - New version needed
 - New (and I hope, last) WGLC

SeND solution

- SEND-based Source-Address Validation Implementation (draft-ietf-savi-send-04)
- Next step: WGLC initiated once IESG review will be initiated for FCFS document

Ethernet-based broadband access network solution

- Cancelled
- Duplicate Address Detection Proxy (draft-ietf-6man-dad-proxy-00) based on SAVI and used for Ethernet-based broadband access network
- Next step: review from savi WG needed in the future

The goals

- To move forward to IESG review all the savi WG documents before the next IETF meeting in Quebec
- To be able to speak about new items for a potential rechartering during the next IETF meeting
- ... or to close the WG

Comments/questions?
