IANA Interface Type YANG Module
draft-ietf-netmod-iana-if-type-00

Abstract

This document defines the initial version of the iana-if-type YANG module.

Status of this Memo

This Internet-Draft is submitted in full conformance with the provisions of BCP 78 and BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <http://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on October 13, 2011.

1. Introduction

This document defines the initial version of the iana-if-type YANG module. This module reflects IANA's "ifType definitions" registry. The latest revision of the module can be obtained from the IANA web site.

2. IANA Maintained Interface Type YANG Module

```
<CODE BEGINS> file "iana-if-type.yang"

module iana-if-type {
  namespace "urn:ietf:params:xml:ns:yang:iana-if-type";

    "This data type is used as the syntax of the 'type'
    leaf in the 'interface' list in the YANG module
    ietf-interface.

    The definition of this typedef with the
    addition of newly assigned values is published
    periodically by the IANA, in either the Assigned
    Numbers RFC, or some derivative of it specific to
    Internet Network Management number assignments. (The
    latest arrangements can be obtained by contacting the
    IANA.)

    Requests for new values should be made to IANA via
    email (iana@iana.org).";
}
}
```

<CODE ENDS>

3. IANA Considerations

This document defines the initial version of the IANA-maintained iana-if-type YANG module. The iana-if-type module is intended to reflect the "ifType definitions" registry. When an interface type is added to this registry, a new "enum" statement must be added to the "iana-if-type" typedef, with the same name and value as the corresponding enumeration in IANAifType-MIB. If the new interface type has a reference, a new "reference" statement should be added to the new "enum" statement. If an interface type is deprecated in the "ifType definitions" registry, the corresponding "enum" statement must be updated with a "status" statement with the value "deprecated".

This document registers a URI in the IETF XML registry [RFC3688]. Following the format in RFC 3688, the following registration is requested to be made.

URI: urn:ietf:params:xml:ns:yang:iana-if-types

Registrant Contact: The NETMOD WG of the IETF.

XML: N/A, the requested URI is an XML namespace.

This document registers one YANG module in the YANG Module Names registry [RFC6020].

name:	iana-if-type
namespace:	urn:ietf:params:xml:ns:yang:iana-if-type
prefix:	ift
reference:	RFC XXXX

4. Security Considerations

Since this document does not introduce any technology or protocol, there are no security issues to be considered for this document itself.

5. Normative References
